# dov'è la mia ombra?

Disegna una linea per aiutare ogni fiore a trovare la sua ombra.

# CODICE COLORE: VALORI TONALI

Nome: \_\_\_\_\_

data: \_\_\_\_\_

Le sfumature e i colori puri variano valori tonali con l'aggiunta di grigio, nero o bianco. Realizza il tuo grafico di valore tonale utilizzando le tre tonalità primarie, per scoprire nuove ombre, tinte e tonalità! Puoi usarlo in seguito come riferimento per il dipinto.

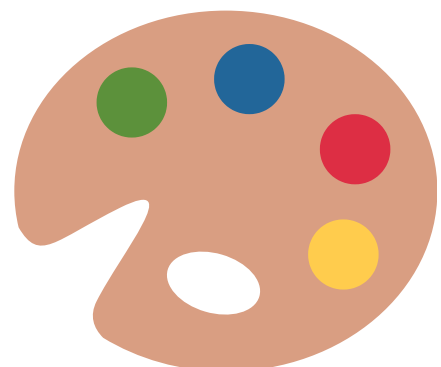

**1** Utilizzando un acquerello o colori acrilici, riempi la prima riga di riquadri con tonalità di rosso puro, giallo e blu.

**2** In seguito, mescola del bianco con i colori della tavolozza. Usa contenitori separati in modo da non contaminare i colori puri. Riempi la prossima riga con i colori più chiari derivanti, i "toni tenui".

**3** Adesso, mescola il grigio con i colori nei contenitori nuovi della tavolozza. Riempi la terza riga con il nuovo colore. Ecco i tuoi "toni forti".

**4** Infine, mescola un po' di nero con i colori puri nei tre contenitori puliti. Riempi l'ultima riga con questi colori più scuri, noti come "ombre". Hai completato il tuo grafico!
